Patau Syndrome Risk(T13)	Low Risk

**Comment** Statistical Evaluation has been done using Life Cycle Screening management software

The Screening test is based on Biochemical results, Patient's history and population data. This indicates a high or low risk category test. Few cases of false positivity can occur in this screening test. Confirmation of screen positive results is recommended in the amniotic fluid. The test is valid between 11th and 13th weeks 6 days of gestation.

Kindly correlate with clinical findings
