Anti-dsDNA 7.2 IU/mL		e Stranded)*, Serum			
Ref. Range	Anti-dsDNA	7.2	IU/m	L	
Negative <10	Ref. Range				

Negative Equivocal 10 - 15 Positive>15

## **Comments:**

The determination of ANA is important for the clinical diagnosis of connective tissue disease, ds DNA antibodies. It represents one of the diagnostic criteria for SLE.

## Kindly correlate with clinical findings

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
