Covid 19 IgG Antibody (Quantitative)*

CLIA

Covid Antibody Quantitative (IgG)	>400	AU/ml	< 3.8
-----------------------------------	------	-------	-------

Ref Range :

Value	Result	Interpretation
Less than 3.8 AU/mL	Negative	Indicates absence of IgG (Anti S1 & Anti S2) antibodies. It can also be negative during incubation period or in early stages of infection/vaccination.
From 3.9 to 14.9 AU/mL	Low Covid IgG Antibody Level	-
15 or above AU/mL	Presence of Covid IgG Antibody	Indicates exposure of the subject to the pathogen or post-vaccination

Antibodies are a part of our Immune System which are produced after an infection or in response to a vaccine. Our body's immunity to a disease is usually indicated by the presence of Antibodies amongst various other immune defense mechanisms.

We are using **CLIA technology for quantitative determination of specific IgG antibodies against spike(S) protein in serum/plasma of Covid infected patients or post vaccination.** Thus this assay supports the immune status of patients , by indicating neutralizing IgG antibodies against S1 and S2 proteins of SARS CoV 2 virus.

Covid IgG test enables us to serially monitor an immune response of our body via antibodies starting from the fourth week after covid infection or vaccination.

A negative IgG antibody test doesn't mean that a person has not acquired immunity as there are other immunemechanisms in our body which work simultaneously.

Kindly correlate with clinical findings

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
