Test Name	Serology Special		Unit	Bio Ref Interval
	Result			

Dengue NS 1 Antigen Test (Elisa)

Dengue NS 1 Antigen ELISA	0.04	Ratio
------------------------------	------	-------

Ref. Range

Negative	Ratio < 0.50
Equivocal	0.50 ≤ Ratio < 1.00
Positive	Ratio ≥ 1.00

Kindly correlate with clinical findings

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the request form. 2. The test results are for the information and interpretation by the referring doctor only. 3. Some tests are referred to other laboratories to provide a wider test menu to the customer. 4. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.

Malaria Antigen, EDTA, EDTA

Malaria Antigen Rapid(P.vivax- pLDH & P. falciparum-HRP-II antigen based)	Negative		Negative
--	----------	--	----------

Interpretation Rapid card test for malaria is a combo kit designed to test Plasmodium falciparum and Plasmodium vivax species of malaria. This is a combo kit coated with specific monoclonal antibodies against pLDH of the P. Vivax and HRP2 of the P. Falciparum. This kit can also detect the combined infection by these two species.

The result of this test needs to be corroborated with clinical features and other laboratory findings. Positive result with faint test line or false negative may be seen in low parasite density. Negative result can also be seen in prozone effect – i.e. very high antigen concentration compared to antibody concentration.

False positive result may be seen in acute Schistosomiasis.

Test may remain positive even after successful anti-malarial therapy and therefore should not be used for monitoring response to anti-malarial treatment.

Advice: “Peripheral smear for Malarial Parasite”
