| Patient Name | : Mrs. Priti Kumari Yogendra Rai | Centre               | : 2061 - Dr. Bnh, Dept. Of Laboratory Medicine |
| Age/Gender   | : 33 Y 9 M 6 D /F                | OP/IP No/UHID        | : OP//MAXHOME/                                 |
| MaxID/Lab ID | : NSSH.1237848/1816012520246     | Collection Date/Time | : 26/Jan/2025 12:25PM                          |
| Ref Doctor   | : Dr.Rishabh Nanavati            | Reporting Date/Time  | : 27/Jan/2025 03:32PM                          |

#### Serology Special

SIN No: NSIN386191

| Test Name | Result | Unit | Bio Ref Interval |
|-----------|--------|------|------------------|
|-----------|--------|------|------------------|

#### Beta-2 Glycoprotein 1, IgM, Serum

|                                    |     |      |     |
|------------------------------------|-----|------|-----|
| Beta-2 Glycoprotein 1, IgM<br>FEIA | 2.9 | U/mL | < 7 |
|------------------------------------|-----|------|-----|

| Result In U/ML | Remarks |
|----------------|---------|
| Negative       | < 7     |
| Equivocal      | 7 - 10  |
| Positive       | > 10    |

#### Interpretation :

Detection of Beta-2 Glycoprotein antibodies are indicative of risk for thrombosis in autoimmune diseases.

Beta-2 Glycoprotein I IgM is intended for the in vitro quantitative measurement of IgM antibodies directed to  $\beta$ 2-Glycoprotein I in human serum and plasma to aid in the diagnosis of antiphospholipid syndrome (APS) and to evaluate the thrombotic risk in patients with systemic lupus erythematosus (SLE). A definitive clinical diagnosis should not be based on the results of a single diagnostic method, but should only be made after all clinical and laboratory findings have been evaluated. Rheumatoid factor (RF) can interfere with the determination of IgM anti- $\beta$ 2-Glycoprotein I antibodies.
