

## Laboratory Investigation Report

Patient Name	Centre
Age/Gender	OP/IP No
Max ID/Mobile	Collection Date/Time
Lab ID	Receiving Date
Ref Doctor	Reporting Date
Passport No.	

### Molecular Diagnostics

Test Name	Result	Unit	Bio Ref Interval
-----------	--------	------	------------------

### Encephalitis/Meningitis Panel ( FilmArray PCR), Csf

Multiplex PCR/Film Array

#### Virus

Cytomegalovirus	Not Detected
Enterovirus	Not Detected
Herpes Simplex Virus 1	Not Detected
Herpes Simplex Virus 2	Not Detected
Human Herpes Virus 6	Not Detected
Varicella Zoster Virus	Not Detected

#### Bacteria

Escherichia Coli k1	Not Detected
Haemophilus influenzae	Not Detected
Listeria Monocytogenes	Not Detected
Neisseria meningitidis	Not Detected
Streptococcus agalactiae	Not Detected
Streptococcus pneumoniae	Not Detected

#### Fungi

Cryptococcus neoformans/gatti	Not Detected
-------------------------------	--------------

#### Comment

- FilmArray Meningitis/Encephalitis (ME) Panel is a qualitative multiplexed nucleic acid-based in vitro diagnostic test intended for use with FilmArray systems.
- The FilmArray ME Panel is capable of simultaneous detection and identification of multiple bacterial, viral, and yeast nucleic acids directly from CSF specimens using the FilmArray ME Panel.
- False negative results may occur when the concentration of organism(s) in the specimen is below the device limit of detection.
- This test is a qualitative test and does not provide a quantitative value for the organism(s) in the specimen.

Passport No.	

### Molecular Diagnostics

Test Name	Result	Unit	Bio Ref Interval
-----------	--------	------	------------------

- Results from this test must be correlated with the clinical history, epidemiological data, and other data available to the clinician evaluating the patient.
- A negative FilmArray ME Panel result does not exclude the possibility of CNS infection and should not be used as the sole basis for diagnosis, treatment, or other management decisions..
- **Sensitivity** of test is 100 %, however may vary in different clinical scenario.
- **Specificity** of test is 100% , however cross-reactivity with human rhinoviruses may occur, but rhinoviruses are rarely present in human cerebrospinal fluid and are not a recognized cause of meningitis.

Kindly correlate with clinical findings
