

Laboratory Investigation Report

Patient Name	Centre
Age/Gender	OP/IP No/UHID
MaxID/Lab ID	Collection Date/Time
Ref Doctor	Reporting Date/Time

Clinical Biochemistry

Test Name	Result	Unit	Bio Ref Interval
IgG (Immunoglobulin IgG), Serum			
Immunoglobulin IgG Immunoturbidimetric	938.00	mg/ dL	700-1600

Interpretation

Polyclonal increase seen in autoimmune diseases (systemic lupus erythematosus, rheumatoid arthritis, Sjögren's syndrome), sarcoidosis, chronic liver disease, some parasitic diseases and chronic or recurrent infections.

Monoclonal gammopathies seen in IgG type multiple myeloma, lymphomas, leukemia, and other malignancies.

Hypogammaglobulinemias, IgG deficiency may be genetic as in severe combined immunodeficiency or acquired as in AIDS. A decrease in IgG also occurs as a result of thermal burns, nephrotic syndrome, protein losing enteropathies and non-IgG myelomas.

Kindly correlate with clinical findings

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
