Test Name	Result	Unit	Bio Ref Interval
<b>Rapid Card Test - HIV I &amp; II*, Serum</b>			
Rapid Card HIV I & II Immunochromatography	Non Reactive		

**Comment** This is only a screening test. All samples detected reactive must be confirmed by using HIV RNA PCR / three different methods. A non- reactive test result does not exclude the possibility of exposure to an infection with HIV ( Window Period) or low viral load.

**Advice:**

1. HIV by 3 different methods
2. Confirmatory HIV RNA Quantitative PCR.

Kindly correlate with clinical findings
