Rapid Card HIV I & II

Immunochromatography

Non Reactive

Comment This is only a screening test. All samples detected reactive must be confirmed by using HIV RNA PCR / three different methods.

A non- reactive test result does not exclude the possibility of exposure to an infection with HIV (Window Period) or low viral load.

Advice:

1. HIV by 3 different methods
2. Confirmatory HIV RNA Quantitative PCR.

Kindly correlate with clinical findings
