Fluoroenzyme Immunoassay			

Comment

ImmunoCAP Phadiatop is an in vitro qualitative and semiquantitative assay for graded determination of IgE antibodies specific to inhalant allergens in human serum or plasma. It is intended for in vitro diagnostic use as an aid in the clinical diagnosis of IgE mediated allergic disorders in conjunction with other clinical findings, and is to be used in clinical laboratories. In patients suffering from extrinsic asthma, hay fever or atopic eczema, symptoms develop immediately after exposure to specific allergens. This immediate type of allergy is a function of a special type of serum antibodies belonging to the IgE class of immunoglobulins.

Hepatitis B Surface Antigen, Serum*

HBsAg CLIA	Non Reactive		
HBsAg Test Value CLIA	0.506	S/CO	< 0.90

Comment

0.00 - 0.89 Negative
0.90 - 0.99 Border Line
>1.00 Reactive

Testing for hepatitis B surface antigen (HBsAg) was done by VITROS Immunodiagnostic System. It uses an immunometric technique for the qualitative detection of HBsAg. It is a screening test to diagnose suspected HBV infection, to monitor the status of infected individuals, for prenatal screening of pregnant women and efficacy of anti-viral drugs. A negative result does not exclude the possibility of exposure to or infection with Hepatitis B virus. In case of borderline (OD>0.9-0.99)/reactive (OD≥1.0) results patient's sample should be confirmed by Neutralization assay (HBsAg confirmatory test)/ RT-PCR for the current status of infection. In case of Reactive/borderline reactive test result we advise to consult gastroenterologist for further evaluation and clinical correlation.

Conditions of Reporting: 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Max Healthcare shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of Max Healthcare or its employees. Liability of Max Healthcare for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory services.
